

## Becoming an Essential Worker means I should be protected like an Essential Worker.

I am an **educator**, and I want to **educate**.

I am an **educator** - but now, I'm also an **essential worker**.

I'm concerned for my safety, my student's safety, and my family's safety, and **I need your help**.

Shouldn't I be able to walk into my classroom and practice my craft safely without playing the part of a healthcare worker taking temperatures? Without documenting student symptoms? Without needing a lawyer's training to understand what information I can and can't collect?

I am an educator, and I want to educate. But I need a process and a tool to help me be sure that I am keeping my entire classroom safe—along with myself and my loved ones.

My institution has a plan to try and keep us safe, but we need support to make this plan a reality. The average educator can't see who's sick until entering a classroom. Even then, sometimes it's hard to tell. Educators are not healthcare workers—taking temperatures exposes us to infection and steals precious minutes away from instruction time. And if I do identify a student showing symptoms, what's the protocol?

We need a solution to keep us out of harm's way while helping to avoid spreading a highly infectious disease like COVID-19 throughout our classes and homes.

## Roll Call

CB Roll Call provides an easy-to-read dashboard that lets me know my class is safe immediately before I walk in.

***Identify students who are clear of symptoms and exposure—and those who are not.***

Using CB COVID-19 Compliance, educators will gain visibility into student symptoms, temperatures, travel, and exposure on an on-demand. CB Roll Call compiles all this data, tagging students in need of further action/questioning and students who should not be in class due to health and safety concerns, giving educators like me the visibility I need before I come to class.

**Simple. Accessible. Reliable.**
